

PREVIEW  
18/19

# HYPER SERIES SKIS

(Continued on next page.)

What could possibly make our line of award winning skis more impressive than they already are? How does hundreds of grams lighter sound? No, this isn't a hypothetical. This is the all-new Hyper Series ski line...

When compared to our standard construction; the Hyper Series skis shed upwards of 15% of their weight, with a paulownia wood core and more carbon fiber woven in to maintain the performance and durability our skis are known for. Tour farther and faster. Squeeze in an extra lap... or two. Or, just make your days in the backcountry a bit easier.

Whether you love the every-day versatility of the **Vector**, the powder-hungry **V8**, the easy skiing **V6**, the stability of the **Charger**, or the simplicity of the **BC** skis. There is a Hyper ski for you.

164cm Wms Hyper Charger

5lbs. 4oz / 2.39kg

133-102-118 / R18

178cm Hyper Charger

6lbs. 1oz / 2.76kg

140-106-124 / R19.5

HYPER SERIES SKIS

HYPER SERIES SKIS

177cm Hyper Vector / BC  
5lbs. 9oz / 2.53kg  
130-96-114 / R19.5

164cm Wms Hyper Vector  
4lbs. 14oz / 2.21kg  
123-92-108 / R18

178cm Hyper V6 / BC  
5lbs. 12oz / 2.61kg  
131-99-111 / R18.5

176cm Hyper V8  
6lbs. 4oz / 2.83kg  
141-112-123 / R17.3

# SPARTAN ASCENT

MEN'S / WOMEN'S

During the 2016/17 season we released the Spartan Splitboard. It was designed as an economical option for boarders looking to get into the backcountry on a factory made splitboard, but without breaking the bank. The Spartan has grown in popularity over the last two seasons, largely due to its playful "directional twin" shape. For many, the only downside to the Spartan was its weight, though it's not unreasonable heavy (especially considering the price point). All the same, there was room for improvement.

We are pleased to now offer the new Spartan Ascent. It's the same shape and camber profile as the original Spartan, but with a construction recipe similar to the Revelator. The results speak for themselves: a playful splitboard that's over a pound lighter than its predecessor. Additionally, we've added two womens sizes and a snazzy new graphic on its super-durable polyamide topsheet.

154cm Wms Spartan Ascent

6lbs. 1oz. / 2.74kg

29.2 - 25.2 - 28.9 / R7.5

162cm Spartan Ascent

6lbs.10oz. / 3.01kg

30.2 - 26.0 - 29.9 / R7.9

- Stainless Steel Rivets
  - Stainless Steel Full-Wrap Tip Loop
  - Dual Point Stainless Steel Tail Clip
  - Voile Strap Tail Attachment
- 1lb. 8oz. / 678g Pair (110mm Medium)

# HYPER GLIDE SKINS

SKI & SPLITBOARD CLIMBING SKINS

These mohair/nylon climbing skins will be your first choice for long approaches, striking the perfect balance between the durability of nylon and superior glide of mohair. They are insanely packable compared to their full-synthetic counterparts, rolling easily into a small storage bag or stowing away in a jacket pocket. And as if that wasn't reason enough, ounce counters will rejoice over their reduced weight.

Of course, they feature our uniquely bomber and time-tested attachment system, engineered to perform under strain and endure years of extreme use.

65% mohair. 35% nylon. Branded green, to match your touring partner's envy...

## Splitboard Skins w/ Tail Clips

Small	148cm-154cm
Medium	155cm-162cm
Large	163cm-173cm

## Ski Skins w/ Tail Clips – 95mm

X-Small	149cm-159cm
Small	158cm-168cm
Medium	167cm-177cm
Large	176cm-186cm
X-Large	185cm-195cm

## Ski Skins w/ Tail Clips – 110mm

X-Small	149cm-159cm
Small	158cm-168cm
Medium	167cm-177cm
Large	176cm-186cm
X-Large	185cm-195cm

## Ski Skins w/ Tail Clips – 130mm

Small	158cm-168cm
