

COMING FALL 19/20

## HYPER DRIFTER

Ten seasons ago, the Voile Drifter wrote a new chapter in backcountry ski lore. The legends tell of mile deep powder fields, and a ski that floated elegantly through Ullr's greatest shows of power. What's known for certain is that its progressive shape and early-rise tip laid the groundwork for our most widely acclaimed skis to-date, including both the SuperCharger and the V8.

Now we're paying homage to the FAT ski that started it all. Introducing the Voile HyperDrifter. It boasts a mighty shovel, our early-rise camber profile, and a long running length in our ultra-lightweight paulownia construction. These all contribute to its astonishing capability when breaking trail, and — along with its impressive overall width — make the experienced backcountry skier's biggest powder dreams come true.

178cm Hyper Drifter

6lbs. 9oz / 2.99kg

155-121-138 / R19.1

## HYPER V-TAIL

From the wild ranges of North America to the mythic Japanese islands, snow surfers the world over have a new reason to celebrate. Introducing the Voile Hyper V-Tail, a powder shredding machine built for the deepest days. Its wide rockered nose keeps you afloat in otherwise chokable pow, with navigation made effortless by its nimble turning radius. Its medium flex and flat elongated tail make certain you never end up in the backseat, while camber underfoot provides purchase on steeper slopes and firm snow.

When massive storm cycles unload their goods, the V-Tail's wake is an arcing wave of heavenly powder. Your most sedate friends would become aroused at the display, but alas: there are no friends on powder days. An ultra-lightweight paulownia core and cap construction mean that you abandoned them on the approach miles ago. But hey, at least you broke trail for them, right?

170cm Hyper V-Tail

7lbs. 2oz / 3.23kg

# STS TOUR BINDING

Hardboot splitboarding isn't so much a revolution as it is a return to the sport's roots, harkening back to the days of the original Mountain Plate. That said, its resurgence has inspired new confidence in splitboard mountaineers the world over. Unobstructed edges have them navigating technical terrain with finesse. They make long and languid strides across open terrain, and ski their board halves with the nonchalance of a backcountry cognoscente. How do these single-plank sages manage to make it look so easy? With the new Voile STS Tour Binding.

Our new Splitboard Tech System is built to be as low tech as possible, providing you with the balance of light weight and durability that is expected of professional mountaineering equipment.

STS TECH TOES: ..... 7.3oz / 206g (pair including hardware)  
STS DUAL HEIGHT CLIMBING HEELS: ..... 5.8oz / 164g (pair including hardware)

Stainless Steel toe plate with T6-Tempered aluminum toggle.

# HOBACK AVALANCHE SHOVELS

Our original avalanche shovel has endured over thirty years without a single drastic change. It was engineered for maximum strength, ease of assembly, and ergonomic efficiency; all of which it delivered in spades (pun intended). Now — in observance of our ski patrollers, mountain guides and avalanche forecaster's input — we're upping the ante. Witness the all-new line of Voile Hoback Avalanche Shovels.

Backcountry travellers will welcome the addition of a flat edged blade when conducting in-the-field observations. The telescoping handle can be adjusted from the familiar 30° angle to an extreme 100° position **without removing the blade: simply depress the pop-pin and twist.** The ferrule of its cold forged and T6-tempered aluminum scoop sustains the impact of every shovel strike, negating the possibility of a broken pin when working in icy conditions or through debris.

## HOBACK D

WEIGHT: ..... 1lb 14oz / 0.85kg  
LENGTH: ..... 31in / 79cm  
EXTENDED: ..... 39in / 99cm  
HANDLE ONLY: ..... 22in / 57cm  
SCOOP ONLY: ..... 12x10in / 30x26cm

## HOBACK DM

WEIGHT: ..... 1lb 11oz / 0.75kg  
LENGTH: ..... 27in / 69cm  
EXTENDED: ..... 33in / 83cm  
HANDLE ONLY: ..... 20in / 51cm  
SCOOP ONLY: ..... 10x10in / 25x26cm

## HOBACK T

WEIGHT: ..... 1lb 12oz / 0.8kg  
LENGTH: ..... 27in / 69cm  
EXTENDED: ..... 35in / 89cm  
HANDLE ONLY: ..... 18in / 45cm  
SCOOP ONLY: ..... 12x10in / 30x26cm

## HOBACK TM

WEIGHT: ..... 1lb 9oz / 0.7kg  
LENGTH: ..... 23in / 57cm  
EXTENDED: ..... 29in / 73cm  
HANDLE ONLY: ..... 15in / 39cm  
SCOOP ONLY: ..... 10x10in / 25x26cm

## VOILE STRAPS – NANO SERIES

The Voile Straps' usefulness stretches far beyond tying a pair of skis together. Sure, that's why they originally came into being... but wind the clock forward by 35 years and you'll find them bundling and binding unruly cargo of every size and shape. Across the planet, the adventurous have come to know and trust this one tool's utility above all others.

Inspired by a few clever bikepackers' and trail builders' modifications to our standard Voile Straps, the all-new Voile Straps Nano Series is designed with the minimalist in mind. They are available in three sizes, each of which will accommodate a load as narrow as a ballpoint pen. They feature the same weatherproof and UV-resistant material that you know and love. They are textured for extra grip, and are fitted with a glass-filled nylon buckle. So when you need a tiny strap that will overdeliver, the Nano Series helps you keep it together.
